Education

University of Central Florida Orlando, FL
Bachelor's Program in Computer Science, Math Minor Expected Graduation Spring 2026
GPA: 3.5
Relevant Courses: Calculus I-III, Matrix & Linear Algebra, Differential Equations, Mathematical Modeling, Intro to C, Data Structures & Algorithms (Java), Security in Computing, Discrete Structures & Logic, Computer Logic & Organization

Experience

Research & Development Intern August 2025 – December 2025
OneEthos – Fintech for Sustainable Finance Remote

- Architected a **fraud detection pipeline** in **Flask** with a **dashboard** to track run history, using a **model ensemble** to score temporal transaction data and flag suspicious patterns.
- Built a **URL shortening service** with **Next.js** and **MongoDB** to provide marketing with campaign-level click tracking and analytics.
- Developed and delivered **core application features** for Green Bank partners across the full stack.
- Owned **end-to-end delivery** of internal tools from requirements gathering through deployment in a fast-paced startup environment.

Hackathons

Crisis Averted – *3rd Best Overall — Hacklytics 2026, Georgia Tech* February 2026

- Built a **3D geospatial intelligence platform** visualizing humanitarian funding gaps on an interactive globe.
- Engineered **data pipelines** with **Databricks** and **Delta Lake** to process and serve crisis severity data.
- Integrated an **AI voice agent** using Google Gemini and ElevenLabs for natural language exploration of crisis data.

Helios AI – *Best Use of ARM — Knight Hacks VIII, UCF* November 2025

- Built an **IoT-powered educational platform** using **Arduinos**, servos, and **solar cells** to demonstrate renewable energy.
- Developed a **real-time dashboard** visualizing KPIs: power generated, money saved, and carbon emissions avoided.
- Integrated **Google ADK** for voice interaction, allowing users to query the dashboard with natural language.

Projects

EpicMap Webapp – *Field Service Frontend — Leaflet.js, JavaScript, HTML/CSS* June 2025 – Present

- Developed a mobile-first **Leaflet.js** map interface for **real-time field data access** across **1,000+ job sites** in **5 Florida counties**.
- Architected a modular frontend with **61 JavaScript modules** organized by feature domain (map, admin, route planner).
- Built a route planning system with **GPS integration**, stop management, and visualization for field crews.

EpicMap API – *Backend Services — Flask, PostgreSQL, PostGIS, REST API* June 2025 – Present

- Architected a **Flask REST API** with **50+ endpoints** spanning geocoding, job management, crew scheduling, and mileage tracking.
- Integrated **county ArcGIS REST services**, **Google Maps**, and **FEMA flood zone** APIs for multi-county parcel geocoding.
- Built **PostGIS-powered geospatial queries** for location-based filtering and parcel boundary analysis.

EpicMap Storage – *Document Infrastructure — Synology NAS, S3, Docker* June 2025 – Present

- Deployed self-hosted document storage on **Synology NAS** using **Garage** with **boto3** over the S3 protocol.
- Integrated file management into the API for field team **document uploads and retrieval**.
- Built **health monitoring** for NAS connectivity on the platform's status page.

Skills

Programming Languages: Python, Java, C & C++, JavaScript, TypeScript, SQL

Tools & Platforms: Git, Docker, Databricks, PostgreSQL, PostGIS, Flask, FastAPI, Supabase, Render, AWS, Vercel, NeoVim, Figma

Languages: Fluent Spanish (Reading, Writing & Speaking)
